Unified Global Security: The Challenge Ahead

C-TPAT Criteria...

Container Security (Importer):

- Container integrity must be maintained to protect against the introduction of unauthorized material and/or persons.
- At point of stuffing, procedures must be in place to properly seal and maintain the integrity of the shipping containers.
- A high security seal must be affixed to all loaded containers bound for the U.S.
- All seals must meet or exceed the current ISO/PAS 17712 standards for “High Security” seals.

Unified Global Security: The Challenge Ahead

C-TPAT Criteria...

Container Security (Highway Carrier):

- When transporting a container or trailer for a C-TPAT importer, a high security seal that meets or exceeds the current ISO PAS 17712 standards for high security seals must be utilized.

Trailer Seals (Highway Carrier):

- The sealing of trailers, to include continuous seal integrity, are crucial elements of a secure supply chain, and remains a critical part of a carrier's commitment to C-TPAT.
- A high security seal must be affixed to all loaded trailers bound for the U.S. All seals must meet or exceed the current ISO PAS 17712 standards for high security seals.

Unified Global Security: The Challenge Ahead

How Do You Know?

- Look for the “H” stamped on the seal:

Bottom of the locking body

Top of the steel bolt or rod

Unified Global Security: The Challenge Ahead

C-TPAT Criteria...

- Seal Affixing Process:
 - Only designated, authorized employees must distribute and affix container seals for integrity purposes. The fewer people who have access to seals, the better!
 - Unauthorized employees must never handle seals!

Unified Global Security: The Challenge Ahead

Container/ Trailer Seals...

- Seal Affixing Process:
 - Seals should be affixed to the right door of the container/ trailer on the hasp that has the welded rivet. This practice will raise the level of security for the shipment.
 - After the seal is affixed to the container, an authorized employee should make sure that the seal is secure by pulling down on it.

Seal Inspection

Seal Verification and Inspection Process:

V V T T

V - View seal & container locking hardware

V - Verify seal number

T - Tug on seal to make sure it's on right

T - Twist & turn seal to make sure it doesn't unscrew
